CUS

EVOTECH. TWO ENTITIES, A NEW EVOLUTION.

EVT-GROUP was born from the union of **two Italian excellence in the field of special tool manufacturing: Tommasin Utensili and Cus Utensili**, companies with over 50 years of experience, known for the high quality and innovation of their products.

Tommasin Utensili is synonymous with **precision and reliability in the production of solid carbide tools and brazed tools in PCD and carbide**, guaranteeing high performance in every application.

Cus Utensili excels in the **design and production of indexable tools and customized solutions for machine tools**, offering tailored instruments for customer needs.

The combination of these two companies gives rise to EVT-GROUP, a group that aims to enhance the specific qualities of each company, expand capabilities, and consolidate leadership in the field of special tools.

CUSTOM TOOLS

FOR US, CUSTOM
IS THE STANDARD.

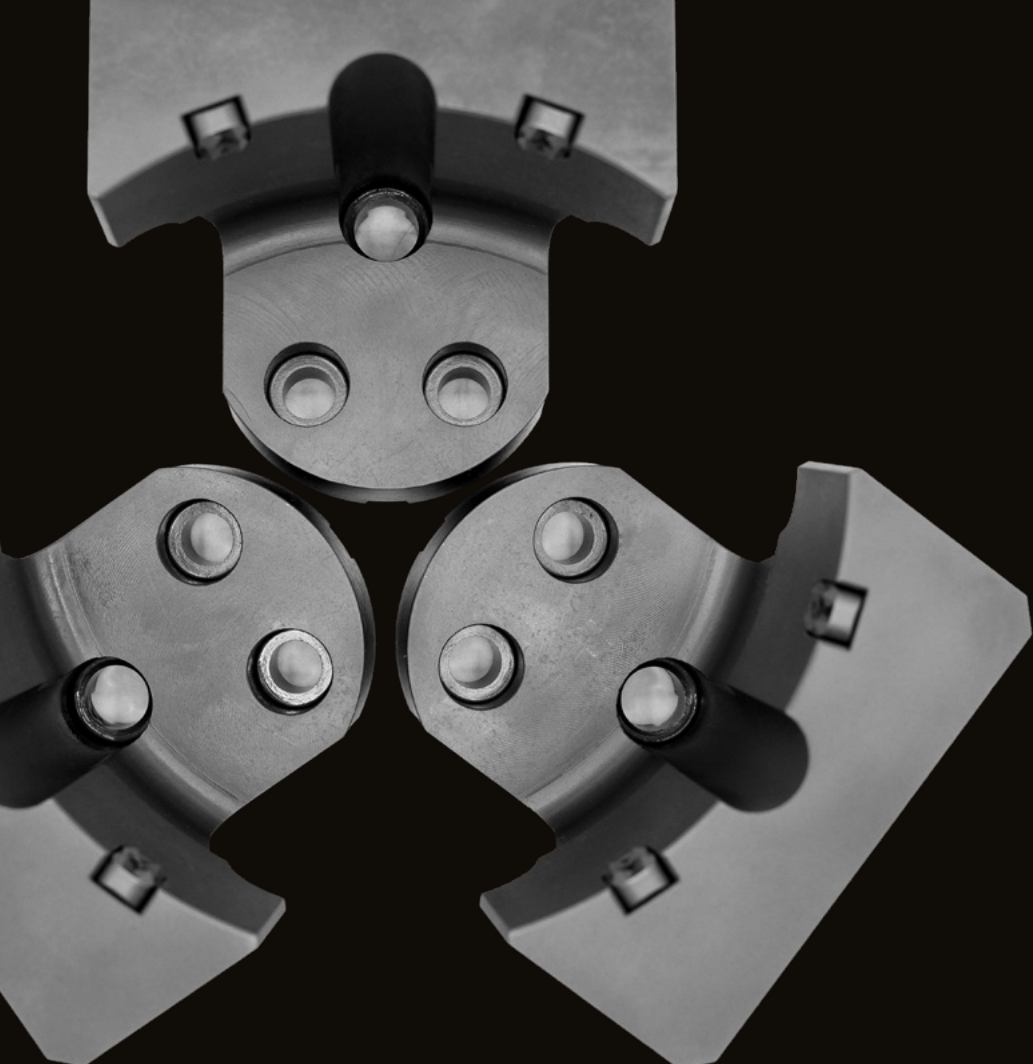

SPECIAL TOOLS

Our company specializes in the production of custom-designed special tools. Our production range includes tools of any shape or geometry, adapting the cutting angles each time based on the material to be machined, application field, and the type of processing.

Our product range includes:

- Cylindrical and circular tools in brazed carbide and solid carbide, PCD, and CBN
- Inserts in PCD, CBN
- Indexable tools

ACCESSORIES FOR CNC MACHINE

We have a specialized technical department for the **design and production of custom workholding systems and accessories for CNC machine tools and automated systems.**

We develop tailor-made solutions starting from technical specifications or customer drawings, ensuring high integration with the machine environment and the intended machining cycle.

Our expertise includes **designing the optimal clamping system** and selecting the most suitable materials based on mechanical stresses and operating conditions.

We can manufacture dedicated equipment, modular systems or special clamping devices for complex or multi-position operations.

Our technical department, in-house machining department and network of qualified suppliers work together closely to ensure **quick development times, repeatability and dimensional precision.**

Each system is designed according to **strict quality standards** to ensure **high performance and reliability over time.**

SHAPED TIPS

We produce all types of shaped inserts in **PCD** (Polycrystalline Diamond), **CBN** (Cubic Boron Nitride), and **Carbide**.

Thanks to our experience and advanced technology, **we produce customized inserts** to meet the specific application needs of our clients, ensuring **maximum precision, durability, and optimal performance**.

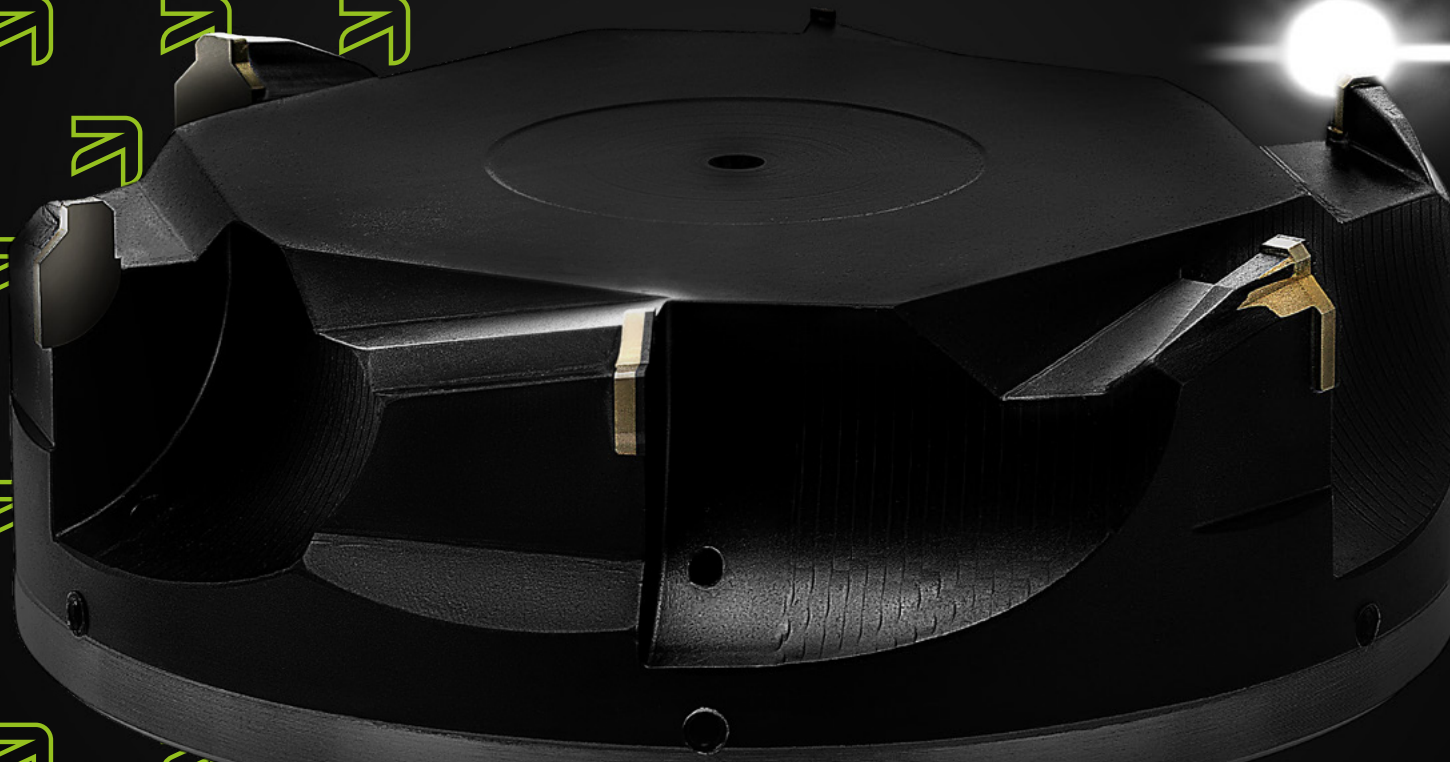

PCD
CBN

LASER TECHNOLOGY

We have integrated **laser technology** into our production process, enabling the **creation of perfect cutting geometries** on **PCD and CBN tools**. This allows our clients to **perform flawless machining** on their products, optimizing time and extending tool life.

HIGH PRECISION
FINISHING FOR PCD AND
CBN CUTTING EDGES

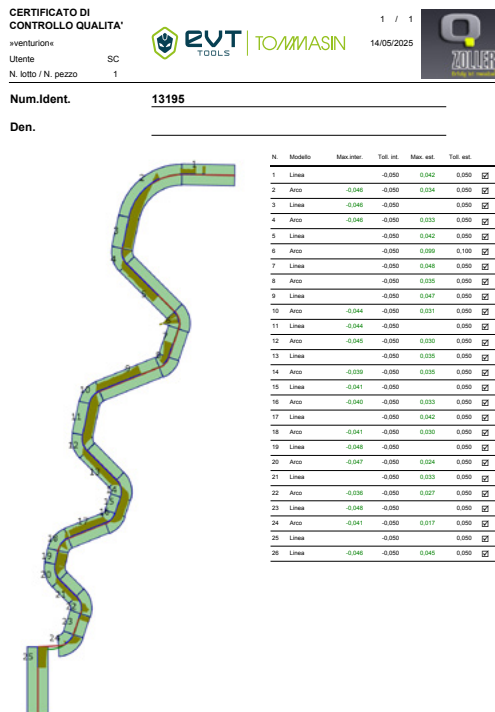

HIGH PRECISION

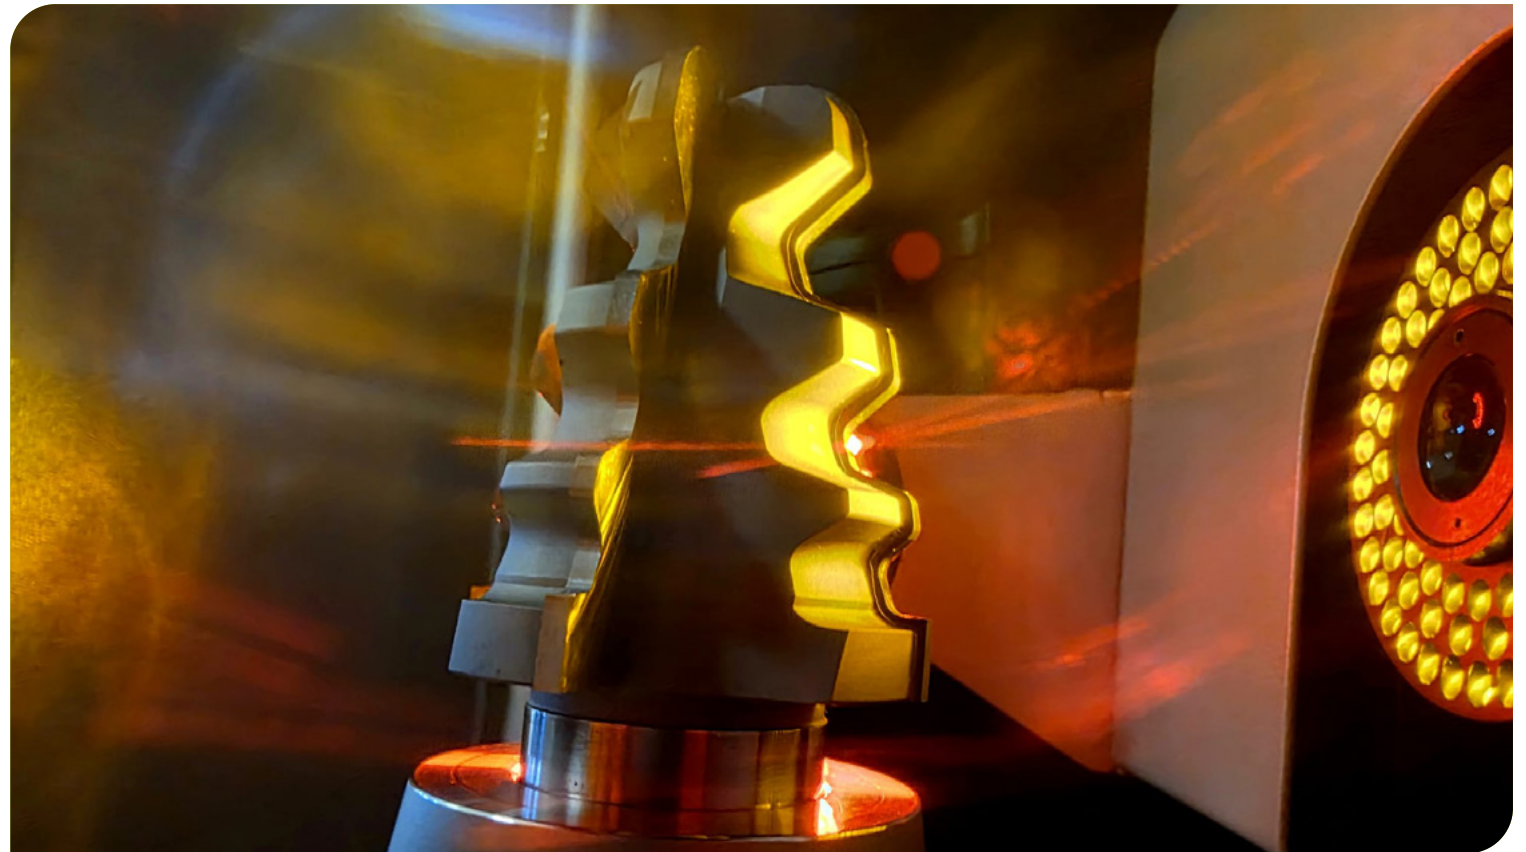

CERTIFIED CONTROLS

Tool quality is the hallmark of EVT-GROUP's production and our primary focus. We select **only the best raw materials** and subject tools to strict inspection to comply with **VISION2000** standards.

An **advanced scanning electron microscope** overlays the tool profile with the technical drawing, instantly identifying dimensional deviations. **A certificate is issued for each special item** as proof of dimensional accuracy.

SERVICES

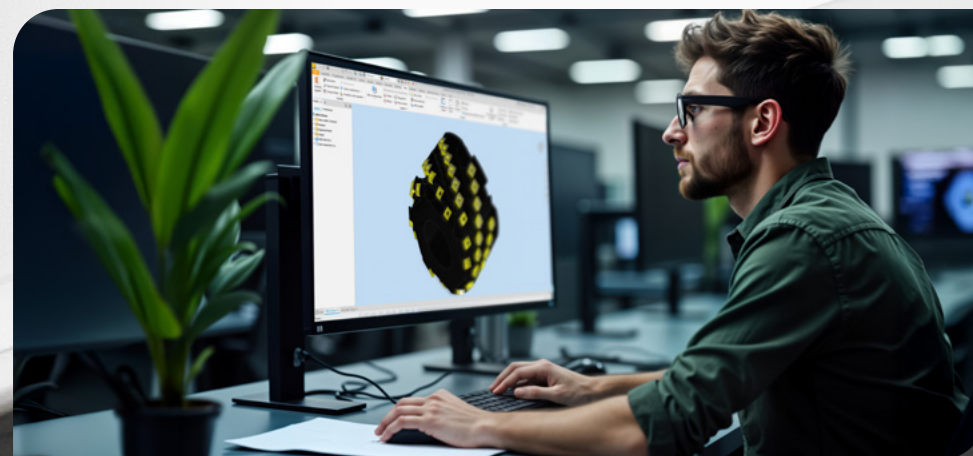

COMMUNICATION, CONSULTING, FLEXIBILITY.

Thanks to a wide range of CNC machines, our main strength is **flexibility**, combined with an agile structure that ensures **fast delivery**.

Over the years, our direct contact with customers has made us **trusted consultants** for those in need of special tools for specific production needs.

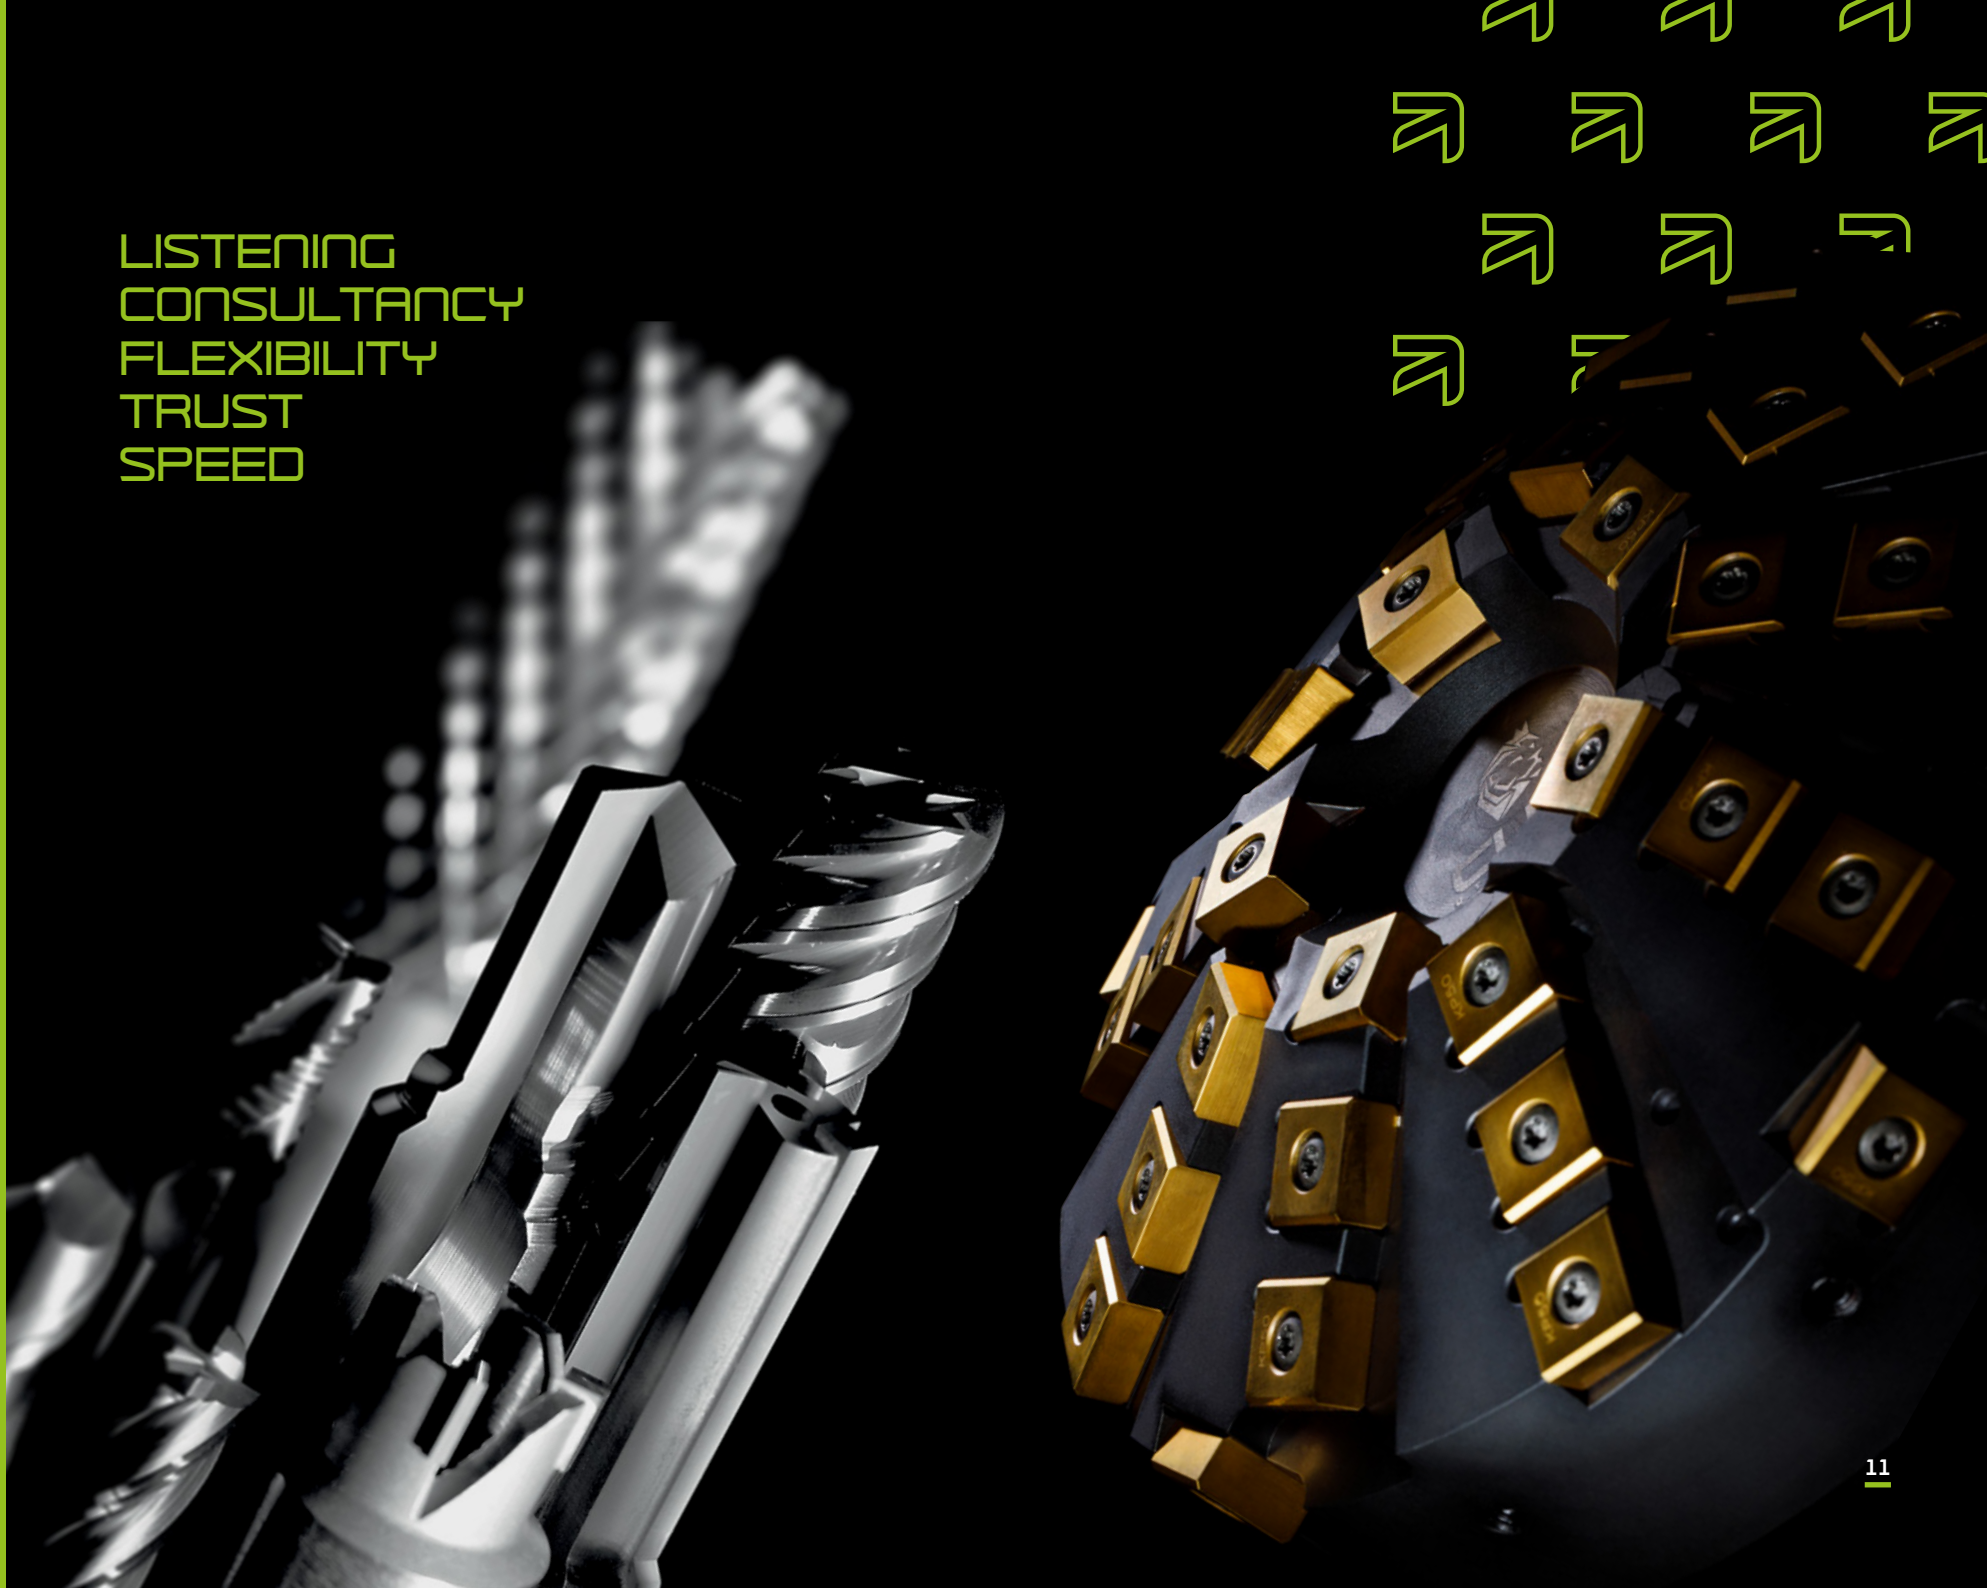

We provide **free consultations at customer** facilities to identify and create the most suitable tool for their production process.

Every special tool comes with a **detailed study and technical drawings**, submitted to the customer for confirmation before production. We respond to every need or urgency through continuous dialogue between our technical department and sales team.

VISION

INNOVATION LOOKING TO THE FUTURE.

EVT-GROUP is not just a new name in the special tools sector, but an **ambitious project aiming to redefine standards of excellence**. Combining experience, technology, and strategic vision, we are ready to face the challenges of the future and become a benchmark for companies seeking cutting-edge solutions.

EVT-GROUP: the strength of tradition, the energy of innovation.

MISSION

THE CUSTOMER AT THE CENTER OF EVOLUTION.

At EVT-GROUP, we believe that innovation and quality are the driving force. That's why our day-to-day commitment is based on solid values:

- **Continuous technological evolution:** we invest in research to develop increasingly high-performance and customized products.
- **Uncompromising quality:** Every tool is designed for reliability, precision, and durability.
- **Flexibility and speed:** We respond promptly to market needs with tailored solutions and fast delivery.
- **Sustainability:** We optimize processes to reduce environmental impact and support energy transition.
- **Gender equality:** We promote an inclusive workplace, valuing talent and skills without distinction.

TOOL HOLDERS

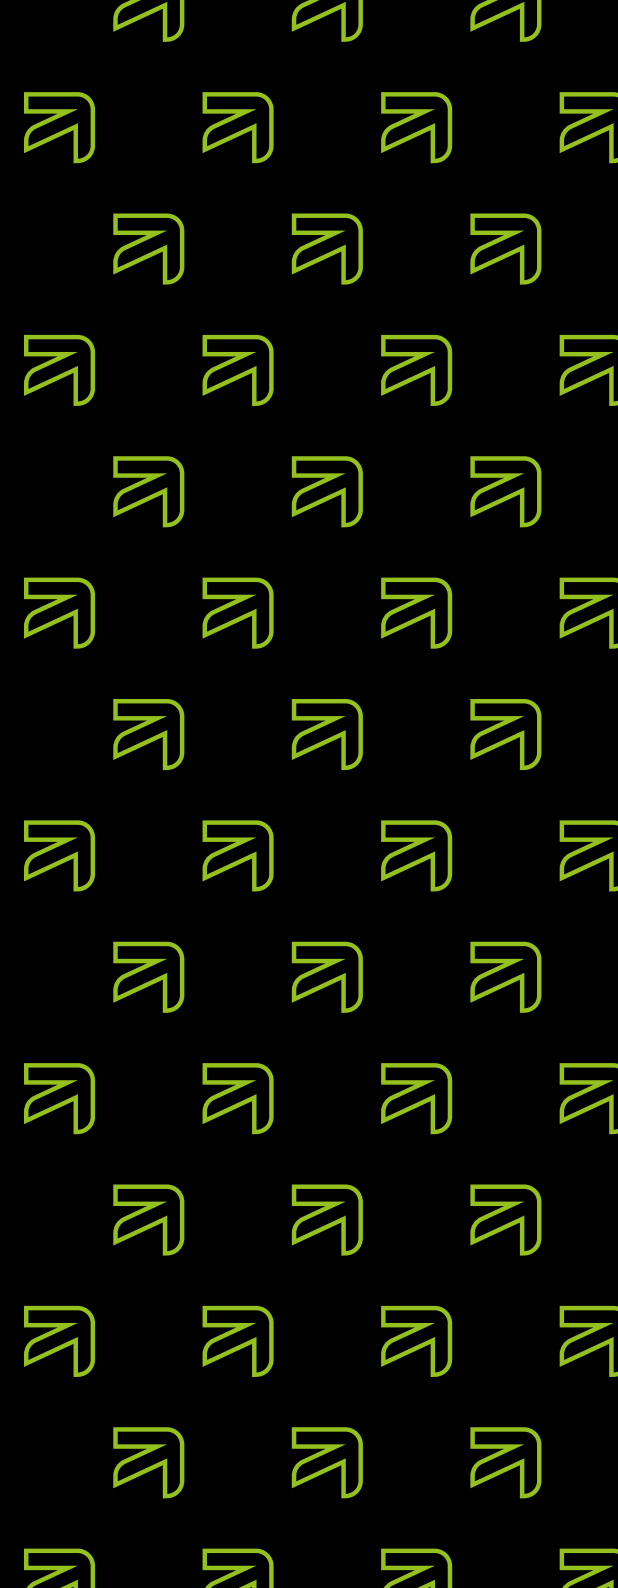

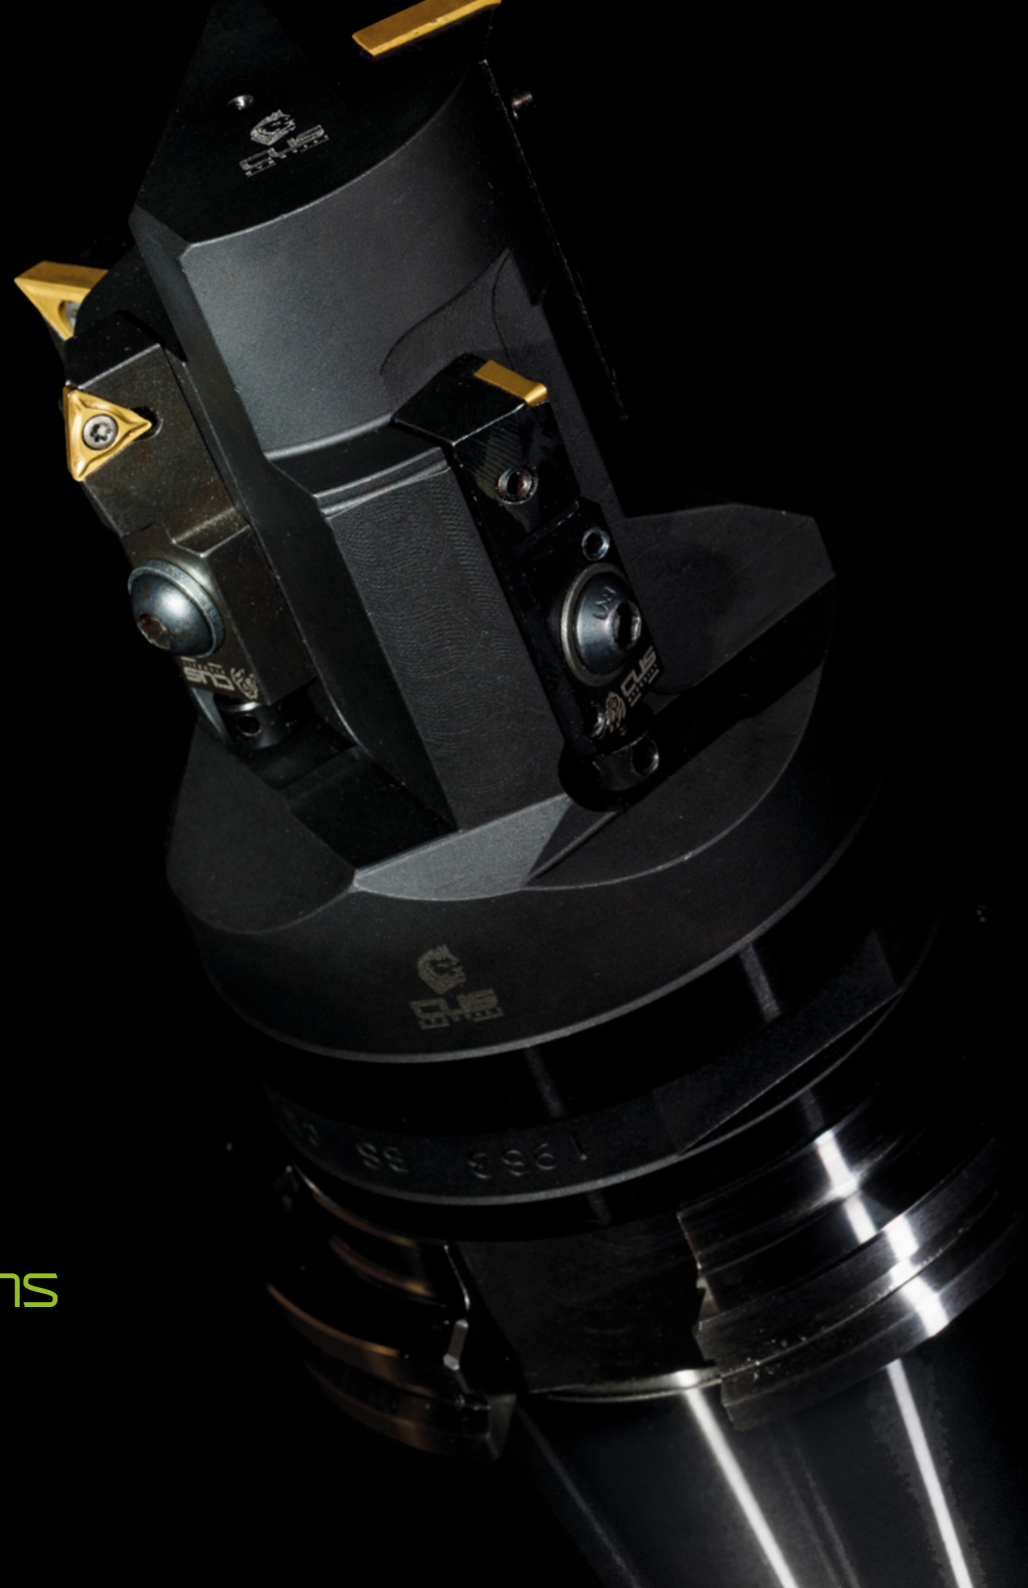

ALL-IN-ONE SERVICE FOR OUR CUSTOMERS.

As part of our commitment to providing a **complete and high-quality service**, we offer our customers a **selection of tool holders that we keep in stock**. This allows us to ensure fast and efficient solutions, reducing lead times and ensuring maximum operational continuity. The availability of in-stock tool holders complements our broader range of services, which includes technical consulting, support, and the supply of customized solutions. **Thanks to this immediate availability, our customers can rely on a prompt response to their needs**, with reliable, ready-to-use products. For more information or to check tool holder availability, our team is always available to assist with any request.

CUS UTENSILI: DESIGNING EFFICIENCY, PRODUCING QUALITY.

Cus Utensili is a company that designs and manufactures special tools for mechanical processing.

Founded in **1974**, it has been operating for over 50 years in the precision mechanics sector.

Over the years, the company has grown thanks to its dedication and **determination to meet the needs of an increasingly demanding and advanced**

clientele, becoming one of the leading Italian companies in the sector.

Design, production technology, material quality, and process control are the key elements that define the quality standards of our products worldwide.

Cus Utensili is the **ideal partner to design and develop effective**, innovative, and unique solutions.

TOMMASIN
UTENSILI

TOMMASIN UTENSILI: TRADITION, INNOVATION, AND QUALITY SINCE 1969.

Founded in **1969** as a **manufacturer of special tools**, **Tommasin Utensili** has built its reputation on a constant commitment to excellence. From the very beginning, the company has been dedicated to the **production of carbide, brazed, and polycrystalline tools**, always maintaining an extremely high quality standard.

The combination of **tradition and experience** has enabled the development of solid know-how, which, together with technology experience and investment guarantees **top-quality products**.

Our growth has been driven by the desire to offer innovative and high-performance solutions, responding to the needs of an ever-evolving market.

In addition to product quality, we have always placed great emphasis on **customer support**, providing technical advice and specialized assistance to ensure maximum efficiency and satisfaction in every application.

Tommasin Utensili continues to invest in technology, research, and development to deliver solutions that meet the industrial challenges of today and tomorrow.
